The Job

Job Responsibilities:

Meeting with the development team to discuss user interface ideas and applications.

Reviewing application requirements and interface designs.

Identifying web-based user interactions.

Developing and implementing highly-responsive user interface components.

Writing application interface codes using JavaScript, following libraries such as React.js or Angular.

Troubleshooting interface software and debugging application codes.

Developing and implementing front-end architecture to support user interface concepts.

Monitoring and improving front-end performance.

Documenting application changes and developing updates.

The Profile

Desired Skills and Experience:

Bachelor's degree in Computer Science, Information Technology, or a similar field.

Previous experience working as a Frontend Developer.

In-depth knowledge of JavaScript, CSS, HTML and front-end languages.

Hands-on experience with JavaScript libraries (e.g. React.js, React Native, and Angular).

Experience with user interface design.

Knowledge of performance testing frameworks.

Experience with browser-based debugging and performance testing software.

Excellent troubleshooting skills.

Good project management skills.

The Employer

Our client is your on-demand dream team. In today's high-speed world, business leaders want highly-processed business intelligence, ideas that challenge the status quo, and first-rate management to craft those ideas into reality.
