Islamabad, Pakistan | Posted on 11/21/2023Education Bachelor or Masters degree in CS or any related fieldExperience5+ YearsState/Province Federal Captial & AJK Country Pakistan Job DescriptionEmumba is looking for a seasoned AWS Solution Architect with over 5 years of experience and expertise in AWS cloud migration. This individual will play a crucial role in pre-sales, designing, architecting, and implementing AWS migration strategies and solutions for our clients, ensuring smooth transitions to the AWS cloud environment. RequirementsSkills, Experience and Qualification   Proven experience as a Solutions Architect, with a focus on AWS cloud solutions.In-depth knowledge of AWS services, with a strong emphasis on migration-related services.   Experience in planning and executing cloud migration projects, including re-hosting, re-platforming, and re-architecting.Proficient in cloud architecture best practices, security principles, and infrastructure as code (IaC). Certifications like AWS Certified Solutions Architect and AWS Certified Solutions Architect Professional would be a big plus. Key Responsibilities Collaborate with clients to run technical workshops by comprehending their migration requirements, contributing to scoping, estimating, and defining project objectives for alignment with customer expectations. Design, architect, and document migration strategies to AWS, taking into account factors like application dependencies, performance, scalability, and security. Work closely with cross-functional teams to ensure seamless migrations, promptly addressing any challenges that may arise during the process. Provide technical leadership and mentorship to teams involved in migration projects, promoting best practices and ensuring high-quality delivery. Emumba offers an outstanding culture that focuses on learning opportunities, international exposure, and career growth.

Taking a few minutes to go over it will help a lot in understanding what it means to work at a place like Emumba. About EmumbaEmumba started in 2011 as a product company with two flagship products: Cricout (a social network around Cricket), and PatientsWithPower (a healthcare platform for cancer patients and treatment hospitals). Both products, though technically successful, were a business failure. Emumba made a pivot to the software services business in 2015 and has never looked back since then. Based out of Islamabad, the company now has 200 people with world class customers. Emumba works in 4 verticals Frontend, dashboards, and visualizations (checkout our homegrown dashboarding framework K2) Backend and data engineering Devops and cloud infrastructureUltra low latency software (read more   here) Majority of of the customers are based out of the United States, while a few others are in the UK. Some of the popular names include Microsoft, Salesforce, Twitch (an Amazon company), Saudi Business Machine (IBM in KSA), A10 Networks (a US public enterprise networking company), Aera Technologies, Extreme Network, Aviatrix, many more. Emumba's outstandingleadership team, composed of Silicon Valley veterans and seasoned engineering leaders, has been able to build agreat culture around the principles of freedom, responsibility, and a relentless pursuit of excellence.
