Company: Exper Labs

Location: Lahore

Category: business-and-financial-operations

Job Description About UsAt 'Exper Labs' we are committed to develop high quality software products using latest technologies. Our mission is to develop mobile and web based applications, which add value to our clients through exceptional performance and usability. We're a services based company and we have established partnerships with several product based companies in North America. We work as offshore teams with our partner clients in close collaboration with their onshore teams. We offer open work culture that fosters creativity. Not only to our clients but also to our employees we offer an enriched working experience, which adds value to their personal development. We have very high standards for recruitment. We look for the most talented individuals and give them the culture to work on their own to do wonders.

What we are looking for?

- Problem solver
- Ability to initiate and lead
- Take sense of project ownership
- Ability to tackle challenges
- Coordinate with offshore and onshore team
- Can do positive attitude
- Desired qualifications & skills
- 3+ years of experience as a Business Analyst

As a Business Analyst, you will have the responsibility to be proactive in understanding and analyzing technical solutions and how to improve them. You will be asked to identify areas to strengthen the operational effectiveness and excellence, leverage technology and improve the quality of process, programs or applications for the business area(s). Engage with stakeholders and understand requirements for issue resolution. Be an active member of a technical support team and manage the resolution of critical incidents. Identify opportunities for functional improvements and enhancements to maximize the effectiveness of available technology. Remain knowledgeable of current technology and carry out research to identify new trends that can be used to achieve maximum results.

What do we

offer? Learning opportunity to work on a large system which scales Experience how engineering and technology is being used to solve business problems Exposure on how to collect large volume of data and extract meaningful insights from it A friendly team with an amazing culture where values are above anything else An environment which promotes collective wisdom irrespective of your seniority level Support for trainings and certifications Rewarding salary package with perks like Gym, Health Insurance, Provident Fund, etc.
