

## Design Engineer - Wellhead Control Panel

[Apply Now](#)

Company: INTECH

Location: Pakistan

Category: architecture-and-engineering

### About The Position

Preparation of engineering deliverables including Specifications, Instrument Datasheets, Logic Diagrams etc.

Carryout sizing calculations for Valves, Flow Meters, Pneumatic & Hydraulic Power Systems.

Have good experience of WHCP design, testing and commissioning.

Instrument cable voltage drop & Intrinsically Safe Circuit Calculations.

Inter-disciplinary document comments and reviews.

Provide inputs and review of engineering drawings including panel layout, electrical schematic, Cable & JB Schedules, Cable Routing Layouts, Instrument Installation Details, Process / Pneumatic Hook-Ups, Interconnection Diagrams, Loop Diagrams, Interconnection Diagrams, Instrument Loop Diagrams.

Carryout onshore and offshore site surveys as required.

Attend interface meetings with Clients and Vendors to progress design scopes.

Review Vendors offers, prepare Vendor and customer Technical Clarifications and prepare Technical Bid Evaluation reports.

### Requirements

Degree in Electrical, Electronics or Instrumentation & Control Engineering with at least 4+

years experience in detailed engineering and design of Instrumentation & Control works for Oil & Gas projects in similar position.

Fully familiar with relevant international codes, standards and recommended practices such as ISA, NEC, NFPA, BS API, IEC, etc.

Competent to carry out the Design activity in the Design-Check-Approve-Authorize cycle.

General knowledge of other related disciplines.

Ability to work efficiently and effectively when managing multiple tasks Must be self-motivated, results oriented, and be flexible to work well under tight schedules in a fast paced multi-disciplinary team environment.

Excellent organizational, interpersonal, and communication skills.

Excellent problem solving, initiative and analytical skills.
