DevOps Engineer (m/f/d)

Full Time

Pakistan

Remote

With Professional Experience

4/26/24

The European Technology Chamber is a registered NGO that enables European companies to use their technologies for the benefit of Europe and mankind - following our vision Technology obliges. As Europe's leading tech network, we are constantly enlarging our team to serve our network even better.

We are currently building our team and now searching for a skilled and experienced DevOps Engineer to join our dynamic team. The ideal candidate should possess a solid understanding of Linux configurations, DNS management, and a proven track record in deploying and maintaining microservices. If you have a passion for automation, containerization, and ensuring the reliability and security of software systems, we want to

hear from you.

DevOps Engineer (m/f/d) - 100% Remote

Your daily tasks:

Deploy, manage, and maintain microservices within a dynamic and scalable environment.

Apply and enforce security best practices, demonstrating a strong understanding of security concepts.

Configure and manage load balancers to ensure optimal distribution of network traffic.

Utilize Ansible and Terraform for infrastructure automation and configuration management.

Implementing and managing CI/CD pipelines to automate software delivery processes.

Configuring and maintaining build automation tools.

Writing infrastructure code using tools like Terraform, CloudFormation, or Ansible to automate the provisioning and management of infrastructure.

Using tools like Puppet, Chef, or Ansible to automate configuration management tasks across servers and environments.

Building, maintaining, and orchestrating Docker containers for application deployment Docker tools.

Managing cloud services on platforms like AWS, Azure, or Google Cloud Platform (GCP).

Provisioning and configuring cloud resources using Infrastructure as Code principles.

Implementing monitoring solutions to track system performance and application health.

Setting up logging mechanisms to gather and analyze application logs for troubleshooting and debugging.

Implementing security best practices throughout the development and deployment processes.

Automating security testing and vulnerability assessments using tools.

What we are looking for:

Bachelor's Degree in Computer Science, Information Technology, or a related field.

5+ years professional experience as a DevOps Engineer

Experience with configuring and maintaining web servers, preferably Apache or Nginx.

Solid understanding of Linux configurations, with a focus on Ubuntu or CentOS.

Certifications in DevOps or related fields will be considered a plus.

Proficient in DNS management to ensure seamless and reliable network operations.

Good knowledge and hands-on experience with Docker and container orchestration tools such as Kubernetes. Familiarity with Cloud Formation, Terraform, ArgoCD, and Ansible is essential.

Expertise with CI/CD tools such as GitLab CI, Jenkins, or similar, ensuring efficient and automated software delivery pipelines.

Excellent English Communication Skills

We offer:

We stand for the vision of a better and more sustainable world - hand in hand with European technology companies. With the personalities who are active in our organization worldwide, you create a great network and inspiration for your daily work - also for your personal future. So you get the chance to grow with us and the whole EU Tech Chamber. Our offer is a role in a fast-moving international organization. If you are looking for an activity with meaning and real impact in a fast growing and truly international organization, apply now with your resume.
