

## Devops Engineer

[Apply Now](#)

Company: INTECH

Location: Pakistan

Category: computer-and-mathematical

### About The Position

INTECH IIS applications - built on its proprietary Industry 4.0 platform: TEAMPLAY - help address operational, optimization, and performance challenges faced by industries, be it in manufacturing, oil & gas, chemical & process, food & beverages, or metals & mining. These applications harness the capabilities of artificial intelligence, machine learning, physical and knowledge modeling, and visualizations for analyses on real-time and historical big data. TEAMPLAY applications provide analytics, insights, trends, decision support, and predictions to help improve performance and reduce downtime or losses.

**We are looking for best of the best cloud/site reliability engineers with 1 to 7 years of experience for our IIS applications.**

### Key Responsibilities:

Run the production environment by monitoring availability and taking a holistic view of system health

Build software and systems to manage infrastructure and applications

Improve reliability, quality, and time-to-market of our suite of software solutions

Measure and optimize system performance, with an eye toward pushing our capabilities forward, getting ahead of customer needs, and innovating to continually improve

Provide primary operational support and engineering for multiple large distributed software applications.

## Requirements

### Technology Requirements:

Bachelor's degree in computer science from recognized university.

Polyglotism with at least Java, Python, and/or Golang knowledge and multiple years of delivering production-grade code under your belt.

Cloud native application architecture and selection of right cloud services.

Pricing and cost optimization.

Experience running software in the cloud preferably Azure and being on call.

Experience with Kubernetes, Docker, and Ansible (or similar such as Terraform, Cloud Formation, etc.)

Growth mentality, willingness to share ideas and continuously improve yourself and the team around you.

Familiar with building distributed and scalable systems.

Optimizations and Performance Improvement techniques.

Self motivated individuals who take pride in their work.
