

Frontend Engineer (Blockchain)

[Apply Now](#)

Company: SnaPhunt

Location: Pakistan

Category: computer-and-mathematical

The Offer

Excellent learning and career development opportunity while working within a fully remote team

The Job

You will be responsible for :

Completing the front-end architecture design and main module development in accordance to the product's functional requirements.

Participating in demand analysis, providing solutions and assisting team members in identifying issues.

Driving optimization and continuous improvement of front-end architecture.

Leading the selection of technology for the front-end architecture.

Continuously researching, learning and adopting the latest development within blockchain front-end development.

The Profile

Skills Required:

You possess a Bachelor degree or above in Computer Science, with 5+ years'

experience in frontend development.

Proficiency in HTML / CSS / Javascript, familiar with ES6/Typescript is required

You have solid knowledge of React Framework.

You are also proficient in using but not reliant on mainstream front-end libraries.

You have experience with blockchain and web3.js.

You have good coding habits.

Good command of English and Chinese language due to communication and documentation in such medium.

The Employer

Our client is developing an order book-centric Decentralised Exchange (DEX) trading protocol that is secured by Ethereum, utilising a Decentralised Autonomous Organisation (DAO) structure that has full control over its treasury. As a next-gen DEX, the client aims to make decentralised exchange trading mainstream and accessible to all, with key features such as Order Book Trading, Leverage Capabilities, and Super-fast Transaction Times amongst others.
