

## Game Developer

[Apply Now](#)

Company: TekRevol

Location: Karachi

Category: other-general

### About Tekrevol:

Tekrevol is a leading mobile app development company dedicated to providing businesses with reliable technological solutions. We have helped countless entrepreneurs achieve their goals and drive results by creating top-rated mobile apps and websites.

As a global company, our aim isn't just to create digital solutions but to help businesses achieve sustainable growth and scalability. Our teams and networks stretch across the United States and have extended its reach to Ukraine & the Middle East.

### Job Description:

**Game Functionality Implementation:** The incumbent is accountable for executing game functionality, transforming design ideas, concepts, and requirements into a compelling and operational game.

**Interdepartmental Collaboration:** Working seamlessly across diverse departments, this role necessitates a candidate possessing exceptional communication skills, a proactive mindset, and a strong team-oriented approach to harmonize a shared vision.

**Translating Design Specifications:** Convert design specifications into a fully operational game, ensuring that the game aligns with the intended design and user experience.

**Code Architecture and Maintenance:** Architect, create, and sustain efficient, reusable, and dependable code to facilitate the game's development and evolution.

**Optimizing Performance and Quality:** Focus on achieving the highest level of performance, quality, and user responsiveness in applications.

**Problem Solving:** Identify and address bottlenecks and bugs within the game, formulating

effective solutions to rectify and mitigate these issues.

#### Job Requirements:

To excel in this role, the ideal candidate should meet the following criteria:

**Experience:** Possess 4-5 years of hands-on experience in Unity Development technologies, demonstrating a robust skill set in game development.

**Unity3D Proficiency:** Exhibit a high level of proficiency in Unity3D, an essential tool for creating games across various platforms.

**Logical Prowess:** Showcase strong logical and problem-solving skills to construct intricate game mechanics and functionalities.

**C# Mastery:** Display expertise in C# programming, a fundamental language for game development in the Unity environment.

**Version Control:** Be well-versed in version control systems like GIT to effectively manage and collaborate on the project's source code.

In addition to these qualifications, the candidate should possess a deep passion for game development, a creative mindset, and the ability to adapt to evolving project requirements.

This role plays a pivotal part in the game development process, requiring not only technical aptitude but also a collaborative and team-centric approach to deliver a compelling gaming experience. Top of Form

**Shift Timings:** Afternoon (12:00 p.m. – 09:00 p.m.)#J-18808-Ljbffr
