GCP Design & Security Optimization Expert -- 3\$250-750 CADWe are seeking a skilled and experienced Google Cloud Platform (GCP) Engineer to conduct a comprehensive review of our GCP infrastructure and provide detailed reports on Security, Cloud Architecture, and Design. The candidate will analyze our current setup, identify potential vulnerabilities, assess architecture for scalability and efficiency, and propose recommendations for improvement.

Key Responsibilities:-

- Perform a thorough Security Review of our GCP infrastructure, identifying potential security risks, vulnerabilities, and compliance issues.-
- Conduct a Cloud Architecture Review to evaluate the overall structure, design patterns, and deployment strategies of our GCP environment.-
- Evaluate the Design of our GCP infrastructure, including resource allocation, network configuration, and service integration, to ensure alignment with best practices and project requirements.-
- Provide detailed reports summarizing findings, including recommendations for enhancing security, optimizing architecture, and improving design.-
- Present findings and recommendations to our team, addressing any questions or concerns and providing guidance on implementation strategies.-
- Security Review Report detailing findings, vulnerabilities, and recommendations for remediation.-
- Cloud Architecture Review Report evaluating the overall structure, scalability, and efficiency of the GCP environment.-
- Design Review Report assessing resource allocation, network configuration, and service integration in the GCP infrastructure.

Presenta tu oferta With my extensive experience in GCP and security optimization, I am confident I can bring a great deal of value to your project. As a certified professional in Windows Security & Forensics, Ethical Hacking, WEB APP SEC Más Hi,I'm a Cloud

Pentester/Auditor.First i'll audit your cloud infra and then implement mitigations with a report.Lets chat...
