Graphic Designer And Animation Expert

Web App Solutions, Pakistan using computer and film technology to create still or moving 3D creations. A 3D artist may work in media production to create elements for video games or 3D movies.

Job duties include the original creation of animation and graphics, using both illustration and computer programs.

Animators can use a range of techniques to make images appear to move, and most specialise in one of the following:

2D drawn animation

2D computer animation

stop frame or stop motion animation

3D computer generated (CG) animation.

Job Specification be creative and artistic

have drawing skills (and sculpting skills for stop frame animation using clay)

have excellent IT skills

be patient and able to concentrate for long periods

pay attention to detail

be observant and understand how people move and express emotions

have good communication and negotiation skills

have good organisational skills

be original and inventive

work well as part of a team and be able to take direction from senior animators, directors and clients

be able to follow a brief and work on their own initiative take criticism well

work well under pressure and to strict deadlines.#J-18808-Ljbffr
