Innovation in Focus: Climate Resilience – Water Financing Partnership Facility (Pakistan)

Publication | January 2024 [SHARE THIS PAGE](#)This publication explains why climate change is a growing risk for Pakistan's agriculture and shows how high-level remote sensing and mathematical programming can provide near real-time data to improve irrigation systems and bolster water security.Focusing on Punjab farming communities, the publication explains how using technology to estimate irrigation canal deficits can promote more efficient water use, better land management, and ensure farmers have reliable water supplies. Highlighting the link between climate change, water-related disasters, and economic shocks, it analyzes water accounting and shows how expanding the use of technology can help deliver equitable water supplies throughout the region.Subscribe to our monthly digest of latest ADB publications.Follow ADB Publications on social media.
