We are seeking a motivated and detail-oriented Junior Software Quality Analyst. As a Junior QA, you will play a crucial role in ensuring the quality and reliability of the software products. This position is ideal for individuals with 1-3 years of experience who are passionate about software testing and eager to grow their skills in a collaborative and innovative environment.

Responsibilities:

- Assist in the design, creation, and execution of software test cases in collaboration with the QA team.
- Participate in the verification of bug fixes and enhancements, contributing to the overall software quality assurance process.
- Conduct research on bug reports, verifying software requirements, and providing technical support where needed.
- Collaborate with cross-functional teams, including Software Developers and Product Managers, to assess project risks and make informed decisions.
- Cross-train on various applications within our software suite to gain a comprehensive understanding of our products.
- Provide support and mentorship to fellow Junior Software Quality Analysts.
- Contribute to decision-making processes related to project timing and development efforts.
- Collaborate with Software Product Management and Development teams to ensure software

requirements are efficient, consistent, and aligned with business needs. • Engage in functional and regression testing for each software release. • Work within an Agile software development environment, participating in commitment meetings, retrospectives, and planning sessions. • Refactor existing tests and ensure adherence to generally accepted Quality Assurance standards and techniques. • Develop a working understanding of Source Control systems. • Independently design quality solutions for small to medium-sized features. • Demonstrate flexibility by working across various global time zones as needed. • Attend regular work hours and be available for overtime when required.
