

Mechanical Design Lead

[Apply Now](#)

Company: INTECH

Location: Pakistan

Category: other-general

About The Position

INTECH Process Automation is looking for a Mechanical Design Lead with an extensive hands-on experience along with management skills.

About Us:

INTECH Process Automation has been helping businesses transform for the future through next-generation Automation and Digital technologies for the past 30 years and counting. We are a globally renowned engineering company specializing in automation, electrical, energy transition, and digitalization solutions. Our application-specific solutions diversified and technically backed portfolio and expertise in equipment from major OEMs and system vendors are what differentiate us.

Description:

Must know FEED, detailed design of brownfield and green field projects in Oil & Gas industry

Conduct Piping Stress Analysis to design documentation and deliverables such as piping flexibility and stress reports, nozzle load reports and pipe support load calculations.

Understanding of material selection process for piping, structure, valves and buildings

Selection / design of static and rotary equipment like pressure vessels, Shell/Tube Heat Exchangers, Storage Tanks, Pumps, Compressors.

Design reviews for Skids including stress analysis of piping and structure analysis

Hands-on experience in piping, instrumentation, and fabrication

Should have a hands-on experience in technical bid evaluations and comparative analysis. An additional experience in proposals, tenders, and bidding procedure would be a plus.

The project, procurement management, and cost-controlling abilities

Vendor and subcontractor management, Inter-discipline coordination, customer conflict resolution, change order management and experience in developing goal oriented team

Requirements

Education: Master's or Bachelors in Mechanical Engineering

Aspiring candidate must have 10+ years of hands-on experience and with 3+ years in the lead role

Gulf experience would be preferred.

Must have an experience in integration & commissioning of mechanical equipment (skids is preferred)

SOFTWARE SKILLS

Must have an experience using the following software:

CADWorx, CAESAR II, STAAD Pro, Tekla, AutoCAD
