Job Title: OpenShift Administrator (with IBM Cloud Packs Expertise) Location: Dubai (On-site) Job Type: Contract (1 year) Job Role: We are seeking a highly skilled OpenShift Administrator with extensive experience in IBM Cloud Packs for an on-site position. The ideal candidate will have a minimum of 5+ year of relevant experience and possess expertise in platform upgrades, specifically from version 4.12 to 4.14. It is essential that candidates have a strong understanding of IBM Cloud Packs, including Integration, Application, and API Connect, as these components play a crucial role in our infrastructure. Additionally, candidates must have hands-on experience with Disconnected setups, particularly in AirGapped environments. The ability to navigate and troubleshoot challenges in disconnected setups is paramount for success in this role. Experience with supporting tools such as ELK (Elasticsearch, Logstash, Kibana), Grafana, and Prometheus is advantageous and will be considered favorably. Job Responsibilities: 1. Perform platform upgrades, including transitioning from OpenShift version 4.12 to 4.14. 2. Manage and maintain IBM Cloud Packs, ensuring smooth integration and operation within our environment. 3. Implement and support Disconnected setups, particularly in AirGapped environments. 4. Troubleshoot and resolve issues related to OpenShift and IBM Cloud Packs. 5. Collaborate with cross-functional teams to ensure seamless operation and integration of services. 6. Provide technical guidance and support to team members and stakeholders. Requirements: 1. Bachelor's degree in Computer Science, Information Technology, or related field. 2. Minimum of 5 year of experience as an OpenShift Administrator. 3. Proficiency in platform upgrades, specifically from OpenShift 4.12 to 4.14. 4. Extensive experience with IBM Cloud Packs, including Integration, Application, and API

Connect. 5. Strong understanding of Disconnected setups, particularly in AirGapped environments. 6. Familiarity with supporting tools such as ELK (Elasticsearch, Logstash, Kibana), Grafana, and Prometheus. 7. Excellent problem-solving skills and the ability to troubleshoot complex issues. 8. Effective communication and collaboration skills. 9. Ability to work on-site and collaborate with team members effectively. If you meet the qualifications and are looking for an exciting opportunity to utilize your skills in OpenShift administration and IBM Cloud Packs expertise, we encourage you to apply. Join our dynamic team and play a key role in supporting our mission-critical infrastructure. Powered by JazzHR
