OSIsoft PI Consultant

Apply Now

Company: INTECH

Location: Pakistan

Category: computer-and-mathematical

About The Position

INTECH Process Automation is looking for an energized and capable OSIsoft PI professional who can lead a team

About Us:

INTECH Process Automation has been helping businesses transform for the future through next-generation Automation and Digital technologies for the past 30 years and counting. We are a globally renowned engineering company specializing in automation, electrical, energy transition, and digitalization solutions. Our application-specific solutions, diversified and technically backed portfolio and expertise in equipment from major OEMs and system vendors are what differentiate us.

Description:

The successful candidate will be responsible for ensuring a smooth Assurance regime and RnD implementation of the best OSIsoft PI system practices in KSA as well as our global offices. He will also be responsible for training the worldwide INTECH employees, providing them awareness through shared material. This opportunity has additional benefits to a marketing competitive salary: medical insurance, life insurance, provident fund, performance based annual increments, employee engagement events and more.

Responsibilities:

Support PI System administration and integration with Business Applications

Configure PI AF, Event Frames, Notifications etc. as per Plant Hierarchy

Monitoring / maintenance of PI-System security & deployment of patches

PI-System performance optimization, monitoring system health, upgrades etc.

Document network configurations, processes, and procedures

Develop on-demand reports, dashboards etc. in PI System

Develop, Test, Deploy, Integrate Analytics, Dashboards, KPI Reports

Setup Plant Models in the Enterprise PI System using PI-AF Structure

Requirements

7+ years of development, integration and deployment experience for OSIsoft PI Systems including Asset Framework Modeling

Total experience must be 10 + years

Must have certification on OSIsoft PI, accreditation is preferred

Experience in PI System Administration and Troubleshooting

Experience with PI Integrator technologies is preferred

Familiar with PI System Security implementation

Experience in supporting the PI Data Historian and related modules including PI AF, PI Web Services, PI-SDK, AF-SDK, PI Notifications, Event Frames and PI Vision etc.

Team player with strong communication skills that can work well with all levels in an organization (business and IT)

Good understanding of networks, protocols, infrastructure, and carrier-grade network topologies

Familiarization in Virtual Infrastructure & Environment deployments (HyperV/VMware etc.) is preferred

OT and IT processes knowledge and familiarization with Process/Oil & Gas plants

Expert skills in verbal and written communications
