

Performance Engineer

[Apply Now](#)

Company: Saphunt

Location: Pakistan

Category: computer-and-mathematical

The Offer

Work within a company with a solid track record of success

Work alongside & learn from best in class talent

Excellent career development opportunities

The Job

Responsibilities:

Develop and execute performance test plans, scenarios, scripts, and procedures to measure system performance under various conditions.

Identify performance bottlenecks and areas for improvement through analysis of system metrics, logs, and other performance data.

Collaborate with software developers, architects, and other stakeholders to implement performance enhancements and optimizations.

Design and implement performance monitoring solutions to continuously assess and improve system performance.

Conduct load testing, stress testing, and scalability testing to assess system behavior and performance under peak load conditions.

Document and communicate performance test results, findings, and recommendations to technical and non-technical stakeholders.

Stay current with industry trends, tools, and techniques related to performance testing and optimization.

The Profile

Qualifications:

Bachelor's degree in Computer Science, Engineering, or related field. Master's degree preferred.

Proven experience as a Performance Engineer or similar role, with a strong background in software development and performance testing.

Solid understanding of software architecture, networking, and database systems.

Strong analytical and problem-solving skills with the ability to troubleshoot complex performance issues.

Experience optimizing, scaling, and fixing performance issues on MongoDB databases and Nodejs servers

Experience developing microservices

Experience monitoring system performance

Experience designing scalable system architecture

The Employer

Our client is a personality-based social/dating app that allows you to deeply understand anyone and connect with people who intuitively understand you.
