

Power Platform Developer (Remote)

[Apply Now](#)

Company: CFB Bots Pte Ltd

Location: Pakistan

Category: computer-and-mathematical

CFB Bots is a leading technology service provider in the fast-growing field of Intelligent Automation. We provide business process automation and digitalisation solutions powered by hyperautomation technologies including Artificial Intelligence (AI) and Robotic Process Automation (RPA).

We partner with large enterprises in their Digital Transformation journey and help them and their employees thrive in the Future of Work. We help our customers unleash the full potential of their human workforce.

Our mission is to co-create the Digital Workforce of the Future, and our vision is to make work enjoyable.

The Role

We are looking for like-minded enthusiast to join us as Power Platform Developer. You will play a key role in helping customers to unleash the full potential of human workforce and drive productivity through the building and implementation of innovative solutions.

In return, you will achieve a high sense of job satisfaction and gain appreciation/recognition as you implement solutions that help liberate users from tedium. You will also have the chance to meet many people across different functions, organizations and industries, as well as to gain exposure to various businesses and their unique challenges. Finally, you will enjoy strong personal growth that will boost your career as you constantly develop and learn new solutions.

Your responsibilities will include:

Design and develop applications using the Microsoft Power Platform, including Power Apps, Power Automate, Power BI and Power Virtual Agents

Liaise directly with the customers to understand business requirements and challenges

Outline solutions that address the customers' pain points and optimizes business processes

Work with all stakeholders to explore and implement best-in-class solutions

Maintain documentation of functional/solution specifications/codes according to best practices

Configure and customize on standard workflows, dashboards, forms, views and develop standard or custom reports

Use multiple Out-of-The-Box connectors with Power Apps, Power Automate and preferably create custom connectors

Create analytics using Power Query and DAX in Power BI

Design and create database models

Exercise creative problem-solving skills when performing end-to-end testing, troubleshooting and end-user support

Provide subject matter expertise around Power Platform and Center of Excellence tool kits

Provide training on Power Platform development and best practices

Assume additional responsibilities as and when assigned

Ideal Profile

Degree/Polytechnic Diploma in Computer Science or equivalent qualification

At least 2 to 3 years of experience in developing and deploying solutions with Power Platform

A deep understanding of the capabilities of Microsoft Power Platform, including Power BI, Power Apps, Power Automate, Power Virtual Agents)

Relevant Microsoft Power Platform certifications is an added advantage

Development skills on Office365 services SharePoint, MSSQL and Azure Services

Ability to produce complex reports using Power BI and integrate Power BI reports and dashboards into PowerApps

Knowledge of using API custom-connectors within PowerApps

Working experience with relational databases MS SQL

Experience and certifications (e.g. PL-100, PL-200, PL-400, PL-500 and PL-600) in the Microsoft stack is highly desirable

Experience in all phases of Software Development Life Cycle (SDLC) which includes gathering and analyzing business requirements, functional/technical specifications, designing, developing, testing, deploying the applications and providing production support

Desire to learn and adapt to new technologies

Ability to work independently and effectively in a team

Strong attention to detail, analytical and enjoy solving problems

Excellent communication skills and project management skills

Ability to work remotely to meet the work requirements of a fast-paced environment

What's on Offer?

Recognition and rewards

Career development and progression

Work flexibility and employee wellbeing
