Job Title: Principal DevOps Engineer Location: Lahore, Karachi, Islamabad Experience: 6 to 8 years Position Overview: We are seeking a highly skilled Principal DevOps Engineer with 6 to 8 years of experience to join our dynamic team in Lahore, Karachi, or Islamabad. The ideal candidate will have advanced expertise in Terraform, good experience with AWS, and basic/normal experience with GitHub Actions. Strong understanding of DevOps concepts and hands-on experience in implementing DevOps practices is essential. Requirements: Bachelor's degree in Computer Science, Engineering, or related field. 6 to 8 years of experience in DevOps roles, with advanced expertise in Terraform. Good experience with AWS services, including EC2, S3, RDS, Lambda, and VPC. Basic/normal experience with GitHub Actions or similar CI/CD tools. Strong understanding of DevOps concepts such as infrastructure as code, continuous integration, and continuous deployment. Hands-on experience with containerization technologies such as Docker and orchestration tools like Kubernetes. Proficiency in scripting languages such as Bash, Python, or PowerShell. Excellent problem-solving skills and attention to detail. Effective communication and collaboration skills, with the ability to work in a fast-paced, Agile environment. Preferred Qualifications: AWS certification (e.g., AWS Certified DevOps Engineer, AWS Certified Solutions Architect). Familiarity with configuration management tools like Ansible or Puppet. Knowledge of security best practices and compliance frameworks. Responsibilities: Lead the design, implementation, and maintenance of scalable and secure infrastructure using Terraform and AWS services. Collaborate with development and operations teams to integrate DevOps practices into the software development lifecycle. Automate deployment,

configuration, and orchestration processes to streamline development workflows and improve release cycles. Implement monitoring, logging, and alerting solutions to ensure high availability and performance of production systems. Continuously improve CI/CD pipelines using GitHub Actions, ensuring code quality, and promoting best practices. Evaluate new technologies and tools to enhance the DevOps toolchain and improve efficiency. Mentor and guide junior team members, providing technical leadership and expertise in DevOps practices. Drive adoption of DevOps culture and practices across the organization, promoting collaboration and knowledge sharing. Powered by JazzHR
