Company: Cooperative Computing

Location: Karachi Division

Category: other-general

Job DescriptionWho we are:Cooperative Computing (C|C) is a digital enablement organization enabling organizations to effectively operate in the automated economy. The future of business is in maximizing relationships through the effective use of technology. With our clients, we discover, strategically engineer a digital strategy and enable these strategies through the implementation of best-in-class applications to achieve clients 10x growth.

Our performance culture is built through our team members, working together to help our clients succeed. We inspire growth with our team members in delivering fanatical and passionate client experiences, knowing effective technology is built with and for people.Our Values:Be Fanatical and Passionate Delivering Superior Client Experiences - It's who we are! Our customers are the center of every idea, process, and decision we create in building sustainable relationships. We over communicate, over deliver & outperform ourselves every time.Growth is Contagious - I grow, You grow, We all grow!.Be Innovative - Looking at tomorrow today. We live outside our comfort zone; we ask difficult questions of ourselves; we take risks, and we are fearless to experiment and lead the way forward.Show Empathy & Be Honest - Every single word spoken, or action performed for our Customers, Team Members, Partners & Stakeholders will be filled with kindness, candor and honesty.High Performance - It's not for everyone - Our culture is our team members. We make the lives of our fellow team members better by first recognizing "I" am a team member first. We measure our progress constantly to be a better version of ourselves with every new day.Life at CC:Life at CC is a fusion of ambition, recognition, and lifestyle, where your career

takes flight. We champion a high-performance culture with top-tier compensation and flexible working models. With us, enjoy robust benefits, milestone celebrations, and unparalleled learning opportunities. We foster a vibrant community through dynamic team activities. Join CC - embark on a journey where every day is rewarding and growth is a guaranteed promise.

About the Role: Cooperative Computing is seeking a skilled and dedicated Product Manager. In this highly visible and impactful role, you will act as the linchpin between business and development teams, representing the interests of both in a balanced manner. We are looking for someone with exceptional project management, communication, and leadership skills. The ideal candidate is a problem-solver who excels in conceiving and defining innovative opportunities.

Mission: The mission of the Product Manager is to foster effective collaboration between stakeholders, understand customer needs, inform the product vision, and manage the execution from conception to launch. This role involves defining product requirements, driving product metrics, managing resources, and using Agile principles to lead software development. By coordinating deployment activities and maintaining close communication with all stakeholders and partners, the Technical Product Manager ensures smooth product development and delivery.

Job Specification

Capabilities (Key Behaviors): The Product Manager will exhibit the following capabilities:

- Ability to develop business plans including market analysis, go-to-market strategies, revenue forecasts, and sales execution strategies.
- Skilled in collaborating with stakeholders to understand customer problems and define product vision.
- Proficient in working cross-functionally with Engineering, Operations, and Software Development teams.
- Expertise in defining product requirements in the form of user stories and maintaining an engineering backlog.
- Proven ability to define and drive product metrics across the organization.
- Skilled at managing development resources and the delivery schedule.
- Proficient in using Agile principles to drive software development.
- Excellent in coordinating deployment activities across all stakeholders and partners.
- Ability to prepare comprehensive release notes and identify the need for documentation and training updates.

Results: Successful development of business plans resulting in effective market penetration and revenue growth. Constructive collaboration with stakeholders, leading to an improved understanding of customer needs and a more focused product vision. Successful coordination of cross-functional teams, driving an effective product strategy. Well-defined product requirements and efficient management of the engineering backlog. Successful definition and tracking of product metrics, enabling data-driven decision making. Effective management of development resources and delivery

schedules, ensuring timely product launches. Successful application of Agile principles, leading to efficient and quality software development. Smooth deployment activities, ensuring seamless product launches and updates. Job Rewards and Benefits Leaves, Medical #J-18808-Ljbffr
