Company: Ingredion

Location: , , Pakistan

Category: architecture-and-engineering

JOB TITLE: Production Engineer LOCATION: MP REPORTS TO: Production Manager
DIRECT REPORTS: N/A WORKPLACE TYPE: On-site Company Background: Ingredion is a global Fortune 500 provider of ingredient solutions that touch millions of lives, every day. With over 19,000 customers in 120 countries, we create solutions that help nourish, comfort, and delight people all over the world. We are proud to source our strength from nature. That's why we're growing sustainably, with an industry-leading product portfolio that includes plant-based proteins, sugar alternatives and clean and simple ingredients that deliver on changing consumer needs while protecting our planet. Although we are best known for our food ingredients, we are much more than a food business. We co-create bespoke solutions with our customers; from cosmetics and beauty to paper and textiles, to pharmaceuticals, driven by relentless curiosity. We make it our business to anticipate industry trends, and to bring together the potential of people, nature and technology to make life better. Rafhan Maize is an affiliate of Ingredion Incorporated in Pakistan. Our strategy is a unique blend of volume growth and operational excellence. We are pursuing tri dimensional strategy to grow organically, geographically and by broadening ingredients portfolio. If you are inspired by professional challenges and the rewards that come from a high level of performance, then Ingredion (Rafhan Maize) is the company for you. At Ingredion (Rafhan Maize) you can be a member of a globally connected team inspired to achieve great things. We don't just make ingredients. We create possibilities. Be What's Next with us. Production Engineer is responsible for implementation of integrated management system and respective supervisory accountability to ensure satisfactory operation of the entire Division

during the shift.

Core Responsibilities:

Operations: To provide support to Production Manager and Principal Engineers in execution of special assignments. To facilitate R & T in execution of new products trials. To ensure safety of product, process equipment and workers. To achieve daily / weekly production targets regarding both quality and quantity. To arrange manpower from available strength for smooth working of the shift & marking attendance of the workers. To ensure that different grades of the products are being kept separately, proper packing material is being used and proper batch numbers / shipping marks are being marked on the SKUs (Stock Keeping Units). To ensure that product losses are being monitored & controlled and weighing scales are in perfect working order. To keep liaison with the Production Engineers of other Divisions for shutdown, fully / partially operating the plant and for maintenance & labor management. To Liaise with other departments, internal customers, suppliers, and other service providers. To ensure that manufacturing materials and supplies are sufficiently drawn from stores in time. Issuance of raw materials, chemicals and packing materials from the store. To comply with the Occupational Health, Safety & Environmental and other Company Policies. To ensure data filled by operators in log sheets is appropriate and actual. To write shift performance report in the Digital Log and prepare performance reports. To monitor KPIs & plan / execute action items for achieving individual / departmental goals. To ensure implementation of Performance Tools, Gemba walk, VPB, SIC boards. To attend inter & intra departmental meetings and take actions / communicate instructions accordingly down the line. To follow instructions from the Production / Senior Managers passed on verbally or in writing. To write the Over Time Authorization Slips for the shift associates. Recommendation of Leave Applications of shift associates.

Quality Control: To conduct RCAs of customer complaints. To coordinate with Shift Analyst / Chemist to find any in-process non-conformances and suggest / implement remedial action to avoid any off-code production. To check the results of each batch of the product and instruct the operators accordingly. To complete the NCIR of each non-conforming batch and keep its record.

Maintenance: To attend gate keeping and scheduling meetings on daily basis. To check performance of process equipment, to ensure proper maintenance of the process equipment and to report / inform the Principal Engineer / Production Manager, if delayed. To ensure notifications for maintenance in SAP & follow up of the Jobs in timely manner. To ensure work permit compliance and liaise with maintenance team in execution of jobs.

House Keeping: To ensure good housekeeping / hygiene of plant & maintain GMP in areas of responsibility.
