

## Project Manager I&C

[Apply Now](#)

Company: INTECH

Location: Pakistan

Category: business-and-financial-operations

### About The Position

INTECH Process Automation is looking for an energized and capable professional for the role of a Project Manager Instrument and Control (PMIC), the primary objective of a Project Manager is to ensure that the project is completed within the defined scope, time, cost, and quality constraints.

Responsible for planning, executing, monitoring, controlling, and closing projects. It is a specialized role within the field of project management that focuses on the management of projects related to instrumentation and control systems.

Completely responsible for the Profit and Loss of the project

Ensure that all assigned projects are delivered with high-quality deliverables as per schedule, within the scope, and within budget

Understand and confirm to all contractual (commercial and technical) requirements of the project

Developing project scopes and objectives, involving all relevant stakeholders, and ensuring technical feasibility

Ensure resource availability and allocation on project tasks. Perform/manage Team HRD to cover any skill gaps

Coordinate internal resources and third parties/vendors for the flawless execution of projects

Prepare project plan/schedule using tools and processes adopted by INTECH and manage it during the execution of the project

Manage project procurement with the support of the Supply chain/procurement department

Use appropriate verification techniques to manage changes in project scope, schedule, and costs

Develop project quality plan and perform quality assurance as well as quality control

Measure project performance using appropriate systems, tools, and techniques as adopted by INTECH

Report and escalate to the INTECH management and customer/End User/project stakeholders as needed

Perform project closure

Manage the relationship with the client and all stakeholders

Perform risk management to minimize/mitigate project risks with the support of the Project Portfolio Manager

Establish and maintain relationships with third parties/vendors

Watch the Company's interest and ask for fair Change Orders, when appropriate

Target repeat business from existing customers without a bidding process through good business relationships and quality of work

Travel to project sites, other INTECH's offices, and customers' offices (local/international) as per business requirements and/or when advised by management.

Observe Company Quality Management System (QMS) requirements

Technical Account Management of assigned customers in the territory/region

Support in sales (on a demand basis) in business development and pre-award activities with the consent of the project portfolio manager

Provide technical guidance (on a demand basis) to the organization's global execution teams

## Requirements

Bachelor's/Master Degree in engineering field

12+ years' of work experience in international projects & engineering of Instrument & Control Systems

Interpersonal and People Skills (multicultural)

Fluent English Communication

Decision Making Skills
