

QA/QC Engineer

[Apply Now](#)

Company: INTECH

Location: Pakistan

Category: other-general

About The Position

INTECH Automation & Intelligence is looking for an energized and capable professional for the role of a QA/QC Engineer

About Us:

INTECH Automation & Intelligence has been helping businesses transform for the future through next-generation Automation and Digital technologies for the past 30 years and counting. We are a globally renowned engineering company specializing in automation, electrical, energy transition, and digitalization solutions. Our application-specific solutions diversified and technically backed portfolio and expertise in equipment from major OEMs and system vendors are what differentiate us.

The general job duties would be:

Lead and conduct audits to ensure compliance with ISO 9001:2015 standards, documenting findings and recommending corrective actions as needed.

Collaborate with cross-functional teams to establish and maintain quality control processes, procedures, and standards.

Participate in the development and implementation of quality policies and objectives.

Perform root cause analysis and implement corrective and preventive actions to address quality issues and improve processes.

Monitor and assess the effectiveness of quality control measures through data analysis and

performance metrics.

Create and maintain comprehensive documentation related to quality procedures, standards, and processes.

Train and educate staff on quality standards, procedures, and best practices.

Provide guidance and support to teams during internal and external audits.

Ensure compliance with industry regulations and standards relevant to the electrical/mechatronics field.

Collaborate with suppliers and vendors to maintain quality standards in the supply chain.

Communicate effectively with team members, management, and external stakeholders regarding quality-related matters.

Continuously seek opportunities for process improvement and implement changes to enhance overall quality and efficiency.

Requirements

Bachelor's degree in Electrical or Mechatronics Engineering from a reputable institution.

Certification or Master's degree in Total Quality Management.

Proven experience as a Lead Auditor for ISO 9001:2015.

Minimum of 2 years of relevant experience in quality assurance and quality control.

Excellent communication skills, both written and verbal.

Proficiency in Microsoft Office applications, including Word, Excel, and PowerPoint.

Strong analytical and problem-solving abilities.

Ability to work effectively in a team and independently.
