Company: Zenithinnovations

Location: , , Pakistan

Category: architecture-and-engineering

Join the dynamic team at Zenith Innovations, a leading software company based in Islamabad, Pakistan. We are seeking a talented Quality Assurance Engineer with at least 1 year of experience to ensure the delivery of top-notch software solutions. If you are passionate about quality, innovation, and excellence, this is an exciting opportunity to contribute to cutting-edge projects and shape the future of technology.ResponsibilitiesConduct thorough testing of software applications to identify and resolve defects before product launches.Collaborate with cross-functional teams to understand project requirements and provide valuable input during the development process.Design and execute test plans, test cases, and test scripts to ensure the functionality, reliability, and performance of software applications.Perform regression testing to ensure that previously identified and resolved defects do not reoccur in new releases.Collaborate with developers to communicate defects, track issues, and verify bug fixes.Document and maintain test cases, testing procedures, and test results to facilitate knowledge transfer and future reference.Work closely with the development team to integrate automated testing into the continuous integration/continuous deployment (CI/CD) pipeline.Stay updated on industry best practices, emerging trends, and new testing tools to continuously improve the QA process.Provide feedback on usability and user experience aspects to contribute to the overall enhancement of software applications.Actively participate in team meetings and contribute insights to improve the overall quality and efficiency of the development process.RequirementsBachelor's degree in Computer Science, Software Engineering, or a related field.Minimum of 1 year of professional experience in quality assurance or software

testing.Strong understanding of software development life cycle (SDLC) and software testing methodologies.Proficient in creating detailed, comprehensive, and well-structured test plans and test cases.Experience with both manual and automated testing tools and frameworks.Solid knowledge of SQL and databases for effective data validation.Strong analytical and problem-solving skills to identify and troubleshoot issues efficiently.Excellent communication and collaboration skills to work effectively within a team.Familiarity with Agile development methodologies is a plus.Proactive attitude, strong attention to detail, and a commitment to delivering high-quality software products.Zenith Innovations facilitates you with its deeper knowledge and strategic plans. We bring your ideas to life and create the exact that's in your mind. We believe in mission and understand how to achieve it.Plaza 135, 4th Floor Block-C ,Civic Center Bahria Town Phase-4 IslamabadCopyright by Zenith Innovations .All Right Reserved.
