

Senior Data Engineer

[Apply Now](#)

Company: CreditBook

Location: , , Pakistan

Category: other-general

Hi, we are CreditBook! CreditBook is building technology that seeks to improve financial outcomes for entrepreneurs. We are excited to be at the forefront of accelerating the digitization of small and medium-sized businesses across Pakistan. The problem that we are solving for is that in emerging markets, a lack of access to technology at the micro and small-business level means that these businesses lack visibility on their cash flows, payables and receivables and spend onerous time and resources in managing paper registers. The resulting broken cashflows limit the ability of these entrepreneurs to use their capital in growing their business or acquiring customers. We're passionate about solving this problem at scale. In the first 12-18 months, CreditBook has secured \$11m+ USD in venture financing and has scaled its technology to tens of thousands of micro-businesses across Pakistan. Our success has been backed by leading investors from around the world, including Tiger Global, Firstminute Capital, Quiet Capital, and Better Tomorrow Ventures. We are keen to partner with curious individuals, passionate about solving for this problem with us. If this sounds like you, we encourage you to apply today!

How you'll make an impact

- Deeply understand data consumers' needs
- Work with stakeholders including the Executive, Product, Data and Design teams to assist with data-related technical issues and support their data infrastructure needs.
- Build a world class data infrastructure understanding in depth the needs of the data consumers
- Ingest at scale external data from multiple sources
- Support Data Science and Data Analysis team in developing end to end Data Products
- Own CreditBook Data Infrastructure

What we'd love to see

- 3+ years of experience in Data engineering and Software Engineering
- Proven experience in building and optimising Big Data pipelines
- Excellent SQL

and Python skills
