Category: other-general

We have an opening for Senior Full Stack Developer

Here're the details

ROR:

The ideal candidate is a self-motivated, multi-tasker, and demonstrated team-player. You will be a lead developer responsible for the development of new software products and enhancements to existing products. You should excel in working with large-scale applications and frameworks and have outstanding communication and leadership skills.

Responsibilities:

– Writing clean, high-quality, high-performance, maintainable code

– Develop and support software including applications, database integration, interfaces, and new functionality enhancements

– Recommend technology stack/ frameworks, taking into consideration scalability, robustness, risks, trade-offs, providing continuity and downtime contingencies in all major software development decisions

– Coordinate cross-functionally to insure project meets business objectives and compliance standards

– Communicate with client to incorporate feedback and enable them in evaluating their ideas technically and implementing them

– Support test and deployment of new products and features

– Code and performance reviews and plan to improve it

– Take ownership of the team and setup team's ways of working to be able to always deliver

quality right on time

Qualifications:

– BS/MS degree in Computer Science, Engineering or a related subject

– Minimum 2 or 2+ years of experience in RubyOnRails with any JS framework(ReactJs, VueJs or Angular)

– Database experience with PostgreSQL or MySQL or Mongodb

– Ability to collaborate in a team environment, and able to adapt effectively and quickly to a rapidly changing environment

– Strong verbal and written communication skills

– Excellent time management skills

– Experience with Agile or Scrum software development methodologies

– DevOps experience would be a plus AWS/GCP

– NodeJS experience would be a plus
