Position

Senior Software Engineer (SSE) - Server Job Location

Lahore Career Level

Mid-Level (4+ years of experience) Job Description

We are seeking a stellar Server API Developer to work on our Mobile development team, working with the latest and cutting edge server technologies. Development tasks will include providing backend server support APIs to front-end applications. Responsibilities will include platform selection, database selection, language selection, development, scalability testing, and optimization. Candidate should have experience in wide range of server technologies, and ability to write custom solutions. Required Skills

A solid foundation in computer science with strong competencies in data structure, algorithms and software design.

Team lead experience (1.5+ year).

Experience in developing server side applications in common scripting languages (e.g. PHP, Node.js, Python, Ruby).

Bachelors/Masters in Computer Science from a reputable institution.

Excellent coding standards / Passionate about programming.

Strong work ethic / Team player / Great communication skills.

Preference will be given to candidates who have:

Experience in Node.js / Python / Django framework.

Knowledge of standard databases (MySQL and PostgreSQL).

Familiarity with the pros and cons of NoSQL databases.

Understanding of RESTful API design / Backend API services development experience.

Contributions in the Open Source community / Experience with Open Source technologies.

Experience in architecting solutions that scale effectively to hundreds of thousands of daily active users.

Game development experience.

Salary Package

We offer highly competitive and lucrative packages that could vary depending on the educational background, work experience, as well as the candidate's performance in the interview. Deadline

ASAP

Caramel Tech Studios (Pvt.) Limited is a young and dynamic company working with some of the best game studios around the world and on their leading products. We are developing games and apps for Mobile as well as Facebook platforms. We offer a fast paced challenging environment to learn and grow.#J-18808-Ljbffr
