

Senior System Engineer

[Apply Now](#)

Company: inbox

Location: , , Pakistan

Category: architecture-and-engineering

Join Inbox Business Technologies as a Senior System Engineer and be part of our dynamic team. As a Senior System Engineer, you will be responsible for overseeing the design, implementation, and maintenance of our organization's systems, ensuring their optimal performance and security. You will work closely with other IT professionals to develop and implement innovative solutions that meet our business needs.

Responsibilities

- Lead and participate in the design, implementation, and maintenance of systems infrastructure
- Ensure the smooth operation of systems, troubleshooting and resolving any technical issues that arise
- Perform system upgrades and migrations
- Implement and maintain security measures and protocols
- Collaborate with cross-functional teams to develop and implement IT solutions
- Monitor system performance and ensure optimal uptime and availability
- Mentor junior system engineers and provide technical guidance and support
