Software Quality Assurance Engineer (SQA)

Apply Now

Company: INTECH

Location: Pakistan

Category: computer-and-mathematical

Requirements

We are looking for Software Quality Assurance Engineer to join our team that is building complex applications atop our Industrial IoT platform. These Industry 4.0 applications help our customers to address operational, optimization, and performance challenges in various industries globally.

Role & Responsibilities:

BSCS from a reputed university with 1-3 years of experience testing enterprise software.

Strong technical skills including SQL, Scripting, Linux, and edge case identification.

Write thorough test cases and maintain requirement traceability.

Estimate, plan, execute and manage the testing effort.

Write, review, and execution of test scenarios both manually and with test automation tools.

Develop, review and maintain artifacts produced during the STLC.

Experience in end-to-end SDLC, agile testing methodologies, and test phases including unit, integration, system, regression, and performance testing.

Excellent communication skills and customer focus.
