

UI/UX Designer

[Apply Now](#)

Company: i2c Inc

Location: Lahore

Category: production

Job Description

Create user-centered designs by considering market analysis, data, customer feedback, user research and technical constraints/opportunities.

Quickly and thoroughly create workflows, wireframes, design mockups and prototypes to effectively conceptualize new product initiatives and features.

Relentlessly simplify and distill complex processes into intuitive and elegant UIs.

Develop and maintain detailed user-interface specifications, working closely with developers to see your design through to deployment.

Effectively collaborates with product managers, product designer, engineers, and researchers to define, conceptualize, and design user-facing products.

Understand user needs.

We are looking for

Education: Bachelors in CS / BFA / Visual Design

Experience: 1-2 Years

Skills

Strong analytical, strategic, and conceptual UX design skills.

Highly knowledgeable of designing for mobile apps and responsive web experiences; well

versed in user interface design processes and methodology, including user-centered design.

Solid negotiation skills across a variety of audiences; can successfully advocate solutions among peers and to executive leadership.

Must have a strong user experience design portfolio that clearly demonstrates consumer-oriented user experience design solutions for complex problems.

Proficiency in using Figma, Sketch, Adobe XD, Photoshop, Illustrator, Miro and Maze.
