

## UI/UX Front End Developer

[Apply Now](#)

Company: Digital Firm

Location: , , Pakistan

Category: other-general

This is an on-site salaried position, based in Islamabad, Pakistan. This is not a design position, it is a front end developer / web designer position. Requirements 3-5 years in web development. Highly experienced in CSS/HTML/JSP. Proficient in the Adobe PS. Experienced in CSS media queries, HTML5. Working knowledge of Mobile and Tablet web design principles. Any PHP/MySQL MVC experience is a plus but not required. Job

Responsibilities: Work directly with the designer and account manager on projects to help code front ends on websites for desktop, tablet, and mobile devices. Assist software engineers on MVC architecture projects by styling CSS layouts/interfaces, facilitate Ajax calls, etc. Establish and manage client and team expectations. Consistently provide innovative and creative ideas, putting forward imaginative alternatives and questioning traditional approaches. Will explore, question, challenge and assimilate the design and production process. Delivering high-quality code and layouts within firm guidelines taking projects from concept to deliverable. Must demonstrate excellent knowledge of core software and must have a full understanding of relevant services, processes, systems and procedures of responsive design. Aptitude with regard to adoption of new technology and process is core to a business that adapts to the rapidly changing demands of its client base. Creating new and innovative visual communications content across various media. Maintain firm's image, identity and communication style.
